Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1890 Excerpt: . . . Art. I. --On the Discovery of Fossil Fish in the Old Red Sandstone Rocks of the Mansfield District. With Plates I, II, and III. By George Sweet. Read April 6, 1889. 1 Some twenty-five years ago, the attention of Mr. Selwyn, then Director of the Geological Survey of Victoria, was directed to some specimens of a purplish red sandstone rock, containing a few fragments of plant remains from the Battery Hill, near Mansfield. The fossils were submitted to Professor McCoy, who studied them, and in consequence, recommended Mr. Selwyn to colour the Mansfield area as Old Red Sandstone. Some twenty years after, Mr. Reginald A. F. Murray, the present Government Geologist, during his geological examination of the district, obtained fossils which had been found by Messrs. Tolmie, sons of the then owner of the Dueran Station-f These were also examined by Professor McCoy, who has been kind enough to write to me as follows concerning them: -- Mr. Murray brought me some vegetable fragments and the remarkable cephalic shield, to which I have given the name of *Rhytidaspis murrayi*, in his honour, as well as the first example of the large *Ichthyodorulite*, which you have since found in such abundance, so curiously resembling, both in size, shape, and tuberculatum, the *Oyracanthus obliquus* (McCoy) from the base of the carboniferous series of the North of England, as to suggest that that genus might not be Selachian, but belong to the head and other parts of the...
