In the philosophy of science, notably Karl Popper and then Thomas Kuhn challenged the concept of progress as the cumulation of factual observations. This paper wants to approach the larger issue of progress within the framework of *Art and Illusion* by asking: in how far do concepts of progress as derived from the philosophy of science relate to the notion of arts More specifically, how did Gombrich challenge the traditional idea of representation as imitation In following, it will be shown that Gombrich's methodology and main concepts are greatly indebted to Popper's theory of falsification. In a second step, Thomas Kuhn's theory of scientific revolution, which opposes Popper's writings, will be outlined in relation to Gombrich and his ideas of perception and classification. 12 pp. Englisch.
