

Electronic Technology and Skills (with CD-ROM electrical power class of secondary vocational education curriculum reform of the national planning of new materials)

Filesize: 1.85 MB

Reviews

Very useful to any or all type of people. This is certainly for those who statte there was not a worth reading through. You can expect to like how the writer write this pdf.

(Dr. Rashawn Lang)

ELECTRONIC TECHNOLOGY AND SKILLS (WITH CD-ROM ELECTRICAL POWER CLASS OF SECONDARY VOCATIONAL EDUCATION CURRICULUM REFORM OF THE NATIONAL PLANNING OF NEW MATERIALS)

paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 271 Publisher: Electronic Industry Pub. Date :2010-07-01 version 1. This book electric power secondary vocational schools. national planning specialty materials. including book mainly analog electronics and digital electronics in two ways. Analog electronics including diodes. transistors. integrated operational amplifier and its applications. Describes the characteristics of the diode structure and classification. the rectifier circuit and the application of the filter circuit types and applications. rectifier. filter circuit testing. transistor and application. composition and analysis of amplifier circuit. amplifier quiescent operating point of the stable. integrated operational amplifier low-frequency power amplifier. audio amplifier circuit installation and commissioning. integrated power supply. switch mode power supply. three-terminal adjustable voltage regulator integrated form of DC power supply assembly and debugging. and application circuit thyristor other; digital electronic technology. including a basic knowledge of digital circuits. combinational logic circuits. flip-flops. sequential logic circuits. digital-analog conversion and analog-digital conversion. Describes the pulse and digital signals. number system and codes. logic gates. basic knowledge of combinational logic circuits. simplification of logic functions. encoder. decoder. making three of the voting machine. RS flip-flop. JK flip-flop. D triggers the production of four Responder. registers. counters. production counters seconds. digital-analog conversion and analog-digital conversion. Attached to the back of each chapter are thinking and practice. to facilitate learning. This book can be used as secondary vocational schools. specialty electrical power. electronic information. electromechanical integration. computer classes and categories of teaching students the book. also available as electronic technology. engineering and technical personnel to learn basic reference books. Contents: living examples of a handheld microphone and crystal diode module is a subject of an application task into the use of a crystal diodes. semiconductors and PN junction Second....
