Excerpt: . grower must strike the balance for himself--the facts being, that the yield is from one-fourth to one-third as great as carrots, and from one-fourth to one-fifth as great as mangolds, while they require but a fraction of the care in cultivation and gathering, that either of these crops do. VARIETIES OF SQUASHES. Owing to the great tendency in the varieties of the Cucurbitaceous Family to cross with each other, hybrids are very common. Seed planted the first season after the crossing has been made, will usually produce a greater crop than either of the parent kinds, and individual squashes will be superior in quality to either of the parents; yet, as a rule, hybridization is not desirable, for, after the first season, there is a deterioration in the quality, below the average of the parent kinds, while the mixed varieties are not so marketable as the pure kinds. Hubbard Squash.--I have traced the history of this squash back about sixty years, when the first specimen was brought into Marlborough by a market-man named Green, who lived in the vicinity of Boston. The person who, when a girl, ate of the first specimen, is now living, an old lady of over four score years, and recalls the original form, which is much like that of the present type--turned up like a Chinese shoe. It is now above twenty years since the variety was first brought to our notice by our old washerwoman named Hubbard;...
